BEREA, MADISON COUNTY, KENTUCKY, MARCH 16, 1911

STOOD THE SUPREME TEST

Last week we published a very menger account of the drowning of Mr. Elihu Garrison and his son in Red Bird, Ciay county. Since then we have received a letter bearing testimony to Mr. Garrison's worth as a citizen which we think deserves all the publicity it can be

given. The man who writes the letter is a competent judge of men and has had a splendid opportunity to know the truth of what he

"Monday evening my old friend Ellhu Garrison and his son Shelby were drowned in Red Bird some miles above the mouth of Big Creek. If there are any good men in Leslie county, and I know there are plenty, he was one of the best."

"He had been unfortunate and has a son in the neultentiary, t proceded at that trial, and the

the penitentiary. I presided at that trial, and the boy was convicted for life on the evidence of his faiher, mother and sister, who were the only eye

"My experience thru that trial convinced me that there are some people who will not swear a tie no matter what the implation; in other words there is some virtue left in the world which will not

Corporation Tax Law Valid Mexican Insurrection Serious -- President Taft Resting at Augusta Gs.-The Veto Fight in English Parliament.

VICTORY FOR THE PRESIDENT The corporation tax iaw outlined by President Taft and submitted to Congress during the wrangle over the Paine-Aidrich tariff was declared constitutional by the Supreme Court of the United States last Monday; the decision being unanimous. The amount of taxes collected under this iaw is more than \$27,000,000. The Court bases its decision upon the fact that the tax is what it claims to be an excise tax and not an inrome tax. It has been bitterly opposed ing serious proportions. The rause from the first and its enemies are of the strike is the objection on the greatly disappointed that the Court part of the firemen to negroes bring hoids it valid.

SITUATION IN MEXICO

in Mexico is serious. The up-rising in a number of deaths. there is of several months duration, and just what the outcome will be ports have it that the federal force going to have things all their ow. the strike on the Queen and Crescent way. Murh speculation is being indulged in an to the proper interpretation of our own government's acmove le simply an army maneuver with no intended political signifirance. It would seem that it will have the political significance, however. The proclamation of the Mexicau President putting the country under martial law is taken to mean as will possibly make the outside that the Government feels the seriousness of the rebeilion.

After his visit to the Commerical Congress at Atlanta, where he made n speech last week, President Taft went to Augusta, Ga., where he is taking a rest which it is said will continue for nine days. He is playing golf and ewinging telsurely on the great hotel veranda, and incidentally, of course, outlining in his mind at least his message to the

extra session of Congress which is

BRITISH PARLIAMENT

to convene on April 4th.

PRESIDENT RESTING

The veto fight la still the topic of greatest interest la Great Britain. The dovernment, that is the party that outlines the policies, the majority party, is pushing Ita advantage to the limit and there seems now to be no doubt whatever that the power of the Upper House will be fimited. The lords are taking the situation very seriously and have frequently lost their temper and their dignity during the last week. Some scenes have been enacted that savor a good deal

and will die of blood poison. May escapes but is eaptured a week later at Winchester and confesses that he killed Meridith but says that Meridith's wife was killed by a shot fired by farmer Freeman who came up at the time of the trouble. The above 'are the slieged facts-not very definite we admit, but they are sufficient for our purpose. But what of them? Nothing more than that they are a terrible indictment of the state of society among us. Three lives sunffed out and for nothing-a little

difference that might have been settled by a soft answer, perhaps, or the resort to a surveyor at most. But life is considered cheaper than that. It is easier to kill than to be reasonable; it is cheaper to kill than to employ a surveyor. Is it? But there is something else too. Can any one wonder that we have a had name? Yes, there are beinous crimes committed else-

where, but that does not justify or shield us in any sense. Crime is an indictment wherever it is found, and needs condemnation and not justilieation. And what are we going to do about it? Get on the defensive as soon as the outside world begins to comment on it? We hope so,

but we hope it will be the right kind of defense-one that will remove the cause of criticism-unake criticism impossible. The difference between us and other peoples in other cities and states is not that we have all the criminals and they none—it is, if there is any difference in their favor, that there are fewer forces

among us at work to prevent, to eradicate, to control crime. To every one disturbed by outside criticism, to every one appstjed by the situation, to every one wanting to know what to do, which way to turn, how to begin, we commend our editorial of last week-The Prevention of Crime-First Step, and we hope to outline the

Great Audience in Chapel, Monday Night, Hears Him Lecture on Temperance.—The Most Masterly Appeal Ever Heard from the Berea Platform.—Second Great Address, Tuesday Morning.

President of the W. C. T. U., had the fourth generation.

RICHMOND P. HOBSON Congressman from Sixth District of

itineray in charge, But Georgetown failed her and she offered him to Berea and Berea secured him, thanks to President Frost, n number of eitlzens aud the Students Temperance Uuion acting thru its president, Mr. Horace Caldwell.

For years it has been becoming more and more evidrat that the old stock argumenta for temperance have lost their force, Their appeal has weakened and as this conviction grew the demand has grown for n new argument, the real argument, the final, irrefutable, scientific argument, and Captain Hohson is the first so far as The Cltizen knows to voice lt. Certainly it is from his fips that it has first been heard is Kentucky. But what is it, and how does it

differ from the old? In the first place it is an appeal for efficieury, for individual, for racial, for human effirienry, and a selentifle demonstration is the basis of the appeal. Alcohol has no food proper-

It was unexpected, but it was what ties. It is a poison, a toxin. A glass many had been long waiting for-a of beer can not be taken without rereal scientifie, non-sentimental argu- dueing the efficienty of the drinker ment for temperance, total abstinence, 12 per cent. Even the temperate use of alcohol lesseas the vitality and the It was unexpected in that it was power to resist disease. So intempernot planned-had not been scheduled since is the potent ally of all diseases, came by chaace, by accident, it it doubles the death rate. Tho white would seem. In fact it was designed corpuscies in the blood are the germ for another place. Captain Hohson destroyers, but alcohol disarms the was to visit just so many places in white corpusries and sets them to Kentucky, and Georgetown was one devouring the gray matter of the of the number. Mrs. Beauchamp, the brain and degeneracy follows to the

Of the offspring of alcoholics \$3 per cent will be ahaorms; and one child in every five on an average will go insane and one in every 3 will be an epileptic. The life of the moderate drinker is on the average 13 years shorter than that of the total abstainer and that of the drunkard is 29 years sborter. Of all crimes 95 per eent are due to alcohol.

In all wars since 500 B. C. there have been 2,800,000 killed and woundod, hut alcohof klifs 700,000 Americans every year. It klifs and wounda 28,-000,000 every year. Each salooa kills 4, has 25 nuortally wounded and 100 seriously wounded every year. The saioons are assassina and the state has just as much right to license nn assassia as it has to legalize saloons, if all nations should declare war upon America she would stand s better show than against alrohol, for war kills but does not degenerate, while alcohol degenerates.

The race advances by evolution but alrohol is the destroyer that makes evolutiou impossible. The nations of the world have fallen in succession before it. An untainted reunant iu earh case has roatinued the struggle on virgin weatern soil but now there is no longer any west-no virgin soil. The race has reached its last stand. The battle is to be fought out now once and for nll-the white race, and America is the battle field.

And there is a real perll, It is the saloon perll. In another respect It may be called the yellow peril. There are 400,000,000 little yellow men in eastern Asin that are more effirient than we because they are temperate—they have no alcohol prohlem. They can shoot as straight as we, they have more endurance and can subsist on one-twentieth of what It takes to support us. We shall fall before them within a few generations unless we conquer the foe that is sapping our efficienry.

We would die for the flag. We would suffer none to wave above lt. But to maintain it on bigh we must conserve and increase our efficiency -our slogan must be total abatainaace, absolute prohibition. One doesn't have to sbstain, but he usuat abstnin If he joins the army. One doesn't have stain but he must abstnin if he is employed by a great ladustrial organization. And the prohibition is not to be of the legislature but of the people-embodied in the constitutions

NEW BANK PRESIDENT

WATCHING THAT MEXICAN "REVOLUTION"

TAFT COMMENDS CONGRESS, BUT ALSO CENSURES IN AT-LANTA SPEECH.

PLEADS FOR CANADA PACT

Declares Failure to Enact Reciprocity Agresment Was Greatest Dissppointment of Sixty-First Session-"Holds Up" D. R. Francis for \$1,000.

Atlants, Ga-In an address before the Southern Commercial Congress Friday President Taft declared that the failure to enact reciprocity with Canada was the greatest disappointment of the Sixty-first congress, and that the greatest achievement was the rstifica-

tion of the treaty with Japan, He reached the convention hall shorty hefore 12 o'clock and was given a tremendous ovation.

The president was introduced by former Governor Francis of Missouri. At the close of the speechmsking a roll call of the atates resulted in \$27. 000 heing subscribed for the continuation of the work of the Southern Commercial Congress. When the state of Missourl was reached in the midst of the roll call. President Taft seized the gavel from the hands of former Governor Francis of that state and, taking charge of the convention, called on Missouri for a subscription. Mr. Fran-

cls, caught unawarea, responded that he was not authorized to subscribe any thing for his state's commercial bodies. "We are not from Missouri, but we must he 'shown,' " replied the presi-

dent. "What will Missouri do?" "I will subscribe \$1,000 and am aure my atate will assume as much more," said Mr. Francis.

After reviewing the remarkable industrial and commercial growth of the south, President Taft referred to the ast congress as follows:

"The Sixty-first congress just closed has enacted more useful and progressive legislation in its three sessions than any congress since the war.

"One of the crying evils of the present day is the expense of litigation. This congress has passed an act making substantial reductions in the cost of appealing cases from the courts of first instance to the courts of appeals." The president then enumerated aev-

eral other laws that were passed. "A great disappointment of the aession," he continued, "was the final defeat of a permanent tariff hoard.

"Finally, and the most important thing which was done in the session just closed, was the ratification of the treaty with Japan.

"Of course, the greatest disappoint ment of the session was the failure of he senate to follow the lead of the house in ratifying the reciprocity agreement made with Canada.

"When we entered upon the negotiations I authorized the secretary of state and his commissioners to offer free trado in everything, but this Cauada could not grant us.

"Canada ia at the parting of the ways. If we now reject this opportunity we shall throw away an opportun-Concord, N. 11 .- A valuation of \$2. Ity for mutual henefit not likely to recur.

"Under my promise to use my ntmost efforts to secure the ratification of this agreement by congress I have aepate to act to call an extra aession for the purpose of securing the ratification from the American battleship cation of the agreement. > Let Contract for N. Y. Postoffice. New York .- The contract for the New York city postaffice was awarded to the Fuller Construction company of New York at its bid of \$2,-615,267.

> Liner Has Stormy Voyage, New York .- After one of the stormiest trips of her whole experience the Mauretania arrived Friday nearly twelve hours late. All the way over she bucked head seas and heavy winds, so that her average speed was cut down to 24.36 knots an hour,

Woman Win Eight-Hour Law Olympia, Wash.—The legislature the influence of such a large quantity closed its session Friday. Among of alcohol, to say nothing of the demeasures passed was an eight-hour generation of nerve and tissue which iaw for women workers and an employea' compensation act.

LIQUOR HABITS IN ENGLAND

Military Man Gives His Views In Medical Temperanca Reviaw-Cost to Each Officer.

The Medical Temperance Review of London, says: It is not often that we get such a candid confession of the bibulous habits of the higher classes as we find in a communication recent is accompanying President Tait on ly sent to one of the London dailies The writer is a military man, and writes to explain the impossibility for an officer in the army to live on the decided to no longer hold back its stipend which the suthorities give The officers provide and pay for the food and drink in the regimental offi cers' mess. It is needless to say that most of them drink wine, beer and spirits, and this, of course, as we all know, is generally a very heavy itenbe established in the republic. The in the expenditure. We, however, dispatch asserts that all aid possible should not have ventured to estimate the amount which an average officer would drink per day as high as this correspondent does, who evidently knows sil shout it. We should, prohably, have been charged with exaggeration, and the extravagance and intemperance, which a certain class of writers is so fond of attributing to temperance works itnt let our milltary correspondent speak for him

He says. "This is a specimen of an

average middle aged officer's routine.

After breakfast a couple of cigarettes. Parade at 8 45 to 11 a. m., then a couple of gissses of heer and a cigsrette Une p m lunch; s couple of gissses of beer, and if a piece of cake is ealen, then a glass of Marsaia ('wine no gentleman should drink', aa Thackersy puts it). Some time during the afternoon, on his return from a walk or ride, a whisky and soda. There along the itio Grande to stop fillhus. Is a rubber from 6 p. m until it is tering and to see that there is no time to change for dinner. It is pure vice, but many a man has a sherry and bitters either before or after he changes. At dinner a reputed pint of of contraband supplies cut off the in- claret, a whisky and soda, or a couple surrectionary movement which has of glasses of beer is the usual thing disturbed conditions generally for After dinner a couple of glasses of wine before a move is made to the snything tike the formation of a re- anteroom, and from then on until bedtime nobody can say another whisky and soda is extravagant over onc's rubber or read, or even over one's lanta and Augusta for a ten days spell of study. The hot grog nightcap is a thing of the past. In hot climates there would be a great many lemon aquashes and gin-and-ginger heers. in cold climates, Newfoundland port takes the pisce of the morning beer. No general on earth would call other net results in the end will constitute than temperate an officer who spent his day as described. Certainly wellto-do people in the city get through more than that per diem. And liritish officers avoid absinthe, so uear to a Frenchinan, and the hig swillings of heer induiged in hy tierman officers occasionally. flut it costs more than a pound a month. The £6 a year. which is known as 'mess allowance,' doubt that the sudden move on the was furmerly known as 'Regent'a alpart of the American government lowance,' and hy old regulations, was was the result of either unofficial rep- paid into the wine fund for the purresentations of foreign governments; pose of letting every officer drink His regarding the situation in Mexico or Majesty's health, free of cost, after

tion in such a way as to call for the eustoins, and we do not doubt that quickest sort of action. The necess there is not so much obvious drunkensity for this speed of mobiliration ness as there used to he. We are not oulte so sure that there is much less ment as a heaven-sent opportunity to drink consumed, but it appears to be answer critics both in and out of spread over the twenty-four hours in congress, and that interpretation was a fashion which enables the drinkers to maintain some control over their reasoning faculties it is a minds of these officials that the true matter for congratulation, both to meaning of the 'mancuvers' soon them and us, whom they have terpretation so quickly put upon the drink absinthe and "big swillings of movement of the troops unquestion beer" flut, neverthele's let us add up what they do drink on the average. and see how that compares with the physiological limit of moderation op the must generous scale We find, Mexican frontier will have to remain then, that six glasses of beer a day. two in the morning, two at funch, and two at dinner, are considered necessary, in addition, one glass of Marsala, a whisky and soda in the after noon, and sherry and bitters before dinner. Two glasses of wine after dinner, and another whisky and soda The quantity of whisky is not stated, and, as we do not wish to exaggerate in the least, we will assume that it is

This is indeed a naive confession

not more than a smnil winegiassful (say two ounces) on each occasion. Now, how does this work out as re

gards aicohoi? Six glasses of beer (3 pints), oquals four ounces alcohol; four glasses of wine (half-pint), equals two ounces alcohol; four ounces of whisky, equals wo onnces alcohol; total, eight

We have rather underestimated the alcoholic strength of the heer and wine so that there can be fittle doubt as to the total amount. This is exactly four times the amount which Professor Austie, the most liberal expounder of the limits of moderation, laid down as the maximum for an adult mun in twenty-four hours, and six times the maximum of Professor Parkes. We must conclude, then, that during the greater part of the time the average firitish officer is not perfectly sober. He can neither study nor think his hest while he is under constant contact with such a quantity

must inevitably cause.

EXPECT DIRT WILL FLY SOON

Covington & Owenton Railroad A Sure Thing

ALL CONDITIONS NEARLY MET

Only a Few Mors Shares to Sell and Grading Will Commance—Further Extension of the Road to Frankfort is Expected.

Owenter .- Only a few more chares of stock remain to be disposed of, when the grading will begin according Cavington and Owenton.

The work has been slow fait it has tion and seem as the remaining four hundred chares of stock have been the enormous amount of freight shipped into this county and the bountiful crisis grown here and a large mimber of cattle and hogs shipped each year

the road will be a paying proposition. When once a road is constructed to Owenton it will not be many years before it will go on through to the capital at Frankfort thereby furnishing a dicect line through north and south.

BLOODSHED IN STRIKE.

Deputy Sheriffs Killsd-Physicians Accompany All Trains,

Somerset.-The strike of the fire mon on the Queen & Croscont route of the Southern rallway reached a crisia here and engineers and Bremen are relusing to go out for four of being shot by supposed sympathizers of the strikers along the route between here and Glen Mary, Tenn, as ten men are reported lettled.

Physicians are carried on all trains for energency cares

Stearms.-11. M. Hollaway, deputy sheriff, was shot and killed while guarding the Q & C, coal chittes. He PUBLISHERS CONVENE AT NICHwas shot from ambush. Deputy Sheriff lawett was also killed at the same

BOYS AFTER PRIZES.

Corn Clubs Reorganized-Great Interest Manifested.

Somerset .- The fulneld County Hoye' Corn cluic has been reorganized and president of the league, presided. with a much larger membership. There are alrow 150 members. The county ord, gave a talk on advertising. For has offered a prize of \$200 for the boy mer Mayor C. E. Woods, of tlichmond, growing the largest amount of corn read a paper on "liow to Get There," per acre at the smallest cost. Last and T. Sanders Orr, of flarrodeburg, year Transdale Willson raised 126 lembers to the acre and his paine was horalded as one of the best com growers in Keutucky. He won \$100 in press of the state and district. timeprizes. This year's crop is expected to diately preceding the meeting the visto much inster than last.

FLOUR MILL BURNED.

Wingo.-The big roller mill belong ing to 11, it. Cariton was destroyed by tire at a loss of several thousand doifacs. This mill was one of the oldest western Kentucky. There was only a contract for the new county jail to the sessment of fast year. annuli amount of insurance as Mr. Carl. Itinestone Co. and for the fixtures to ton had tet two policies lapse about the Stewart fron Works Co. three weeks ago, Heedes the house and machinery being a total loss there were 200 barrels of flour and a large quantity of grain destroyed. The origin of the fire is unknown.

MONEY FOR SHEEP KILLED.

Paris.-County Clerk Paton has recrived from the auditor of claims at Frankfort the money due the farmers of Hourbon county for sheep killed by does during the past year. The total amount realized from the dog tax in Itourbon county was \$1,147.20, while the shoop claims tembed \$3,356. The was instantly killed by a failing tree. claims were promited at about 33 per Most of his head was torn to shreds. cent.

CARLISLE GETS CONVENTION.

Carlisdo.-It is announced that the 1911 convention of the Christian Woman's Ikard of Missions and the Itibie schools of the thristian church in the of il. C. Trigg, the weil-known Giaseighth district of Kentucky will be gow capitalist, will leave in a few days held in this city May 17, 18 and 19. The for itrazii, where he has accepted a district is composed of the counties of Hourton, Clark, Montgomery, Balli, Krueger spent last year in ttrazii, but Harrison, Nicholas and others in this lowing to the climate he felt that he section. There will be a large attend- ind better remain here, but the comance of delegates from every church of the district.

WILL GET FIFTY MIKADOS.

Lexington.-The Queen & Crescent for the curve and grade of the road.

TOBACCO BARN BURNS.

Sideview.- A large tobacco barn belonging to Earl Farris was burned the board of equalization, shows only with ail its contents, consisting of 35. | t2 diamonds were listed in the county 000 pounds of Jobacco, farm imple and those were valued at \$800. ments and chickens. The los : is about \$6,000, with insurance of \$4,000. The condiaries.

Two States Bank Seems to Be An Absolute Failure—Cashier Missing.

Stephensport.-Only the fixtures are ieft at the Two States bank of this place, which closed its doors. Cashier J. S. Adair is gone. Those investigating the bank's affairs have been finabie to locate him. Developments show the bank was looted before the doors were closed and that the woman aselstant cashler, Miss Edna Payne, who often was feft in charge of the concern when Adnir was away on frequent business trips, lost the savings of a illetime as well as those of her mother, which had been invested in the funtifution.

"The bank is ruined," said Orlando Smith, one of the henviost etockholders, "and any number of my associates are insolvent. They won't be able; to premise on the electric line between to begin to meet the double liability bank act.'

Adair, it is said, borrowed \$27,000 of been constantly pushed to consummathe bank's funds and stockholders declare other collateral held by the bank and thought to be worthices, was obsold, work will begin. The people of tained for the bank through him, Nke-owen certainly need an outlet with ity trebling the original sum thought

REVIEW

Sunday School Lesson for Mar. 26, 1911 Specially Arranged for This Paper

GOLDEN TEXT-"Happy Is that peo-sic whose God is the Lord."-Psa. 141:15.

The object of the first century of the divided kingdom and its lessons was to develop and train a people of God, through whom to make the whole world a people of God. Salvation for the individual and for the human race. The united kingdom did n great work in this direction. But the time came when there was danger of its failure. lience came the divided kingdom, lhrough which there was a double experiment in the development of the ingdom of God.

The period covered was about 90 years B. C., 982 to 893. The country was Palestine, within its usual boundaries. The course of development runs in two lines: The royal, the course as represented by the kings, the ciril history, and the religious development, represented fargely by the prophets.

The kingdom of Judah was about haif as jarge as israej, its capital was Jerusaiem, and the temple was the religious center. Large numbers of tha more religious people came to Judah from israel. Judah was sheitered from attack on the north hy Israei's being between them and the nearest and most dangerous enemies, white a desert was a great defense on the south. This position also saved them from close contact with heathenism and its degredations.

The leading kings were Rehaboam, 17 years; Asa, 40 years; Je-hoshaphat, 25 years. Under Asa and Jehoshaphst there were great religious revivais and religious reforms, alternating with declines. ilere was a great struggle belween good and evil, and the good seems to have gained. In a few cases there were revelations from God. He did everything he could to keep the peop!e obedient to his laws, and train them in the religious life, that they might be the kingdom of God to hiess the world. There were n few prophets of whom little is known save their names. The conflict of religion with evil in Judah, though not ending in complete victory, made a decided gain for the right.

Why do we celebrate and praise our forefathers? Not simply because they were stout hearted. Many a freebooter and many a soldier of fortuno has been that. it is because they were stout hearted for an ideal, their ideal and ours, civil and religious liherty; and whenever and wherever men and women thus devoted themseives to idesi and not materisi things, there the world'a heroes are born, and born to he free.

Some biessings come to us, not in spite of, but just because of, our hostfle environment. The stimulus of hostile climate produces the robust race. Where nature always smiles and everything is friendly there is no such thing as beneficent discipline, and a soft, languid race is perpetunted. The man of the temperate zone owes his superior physical vigor, his keener mental capacity, his alertness, his inventiveness, very much to the elimatic conditions under which he lives. He is forced to activity, and so he quickly outstrips his languid neighbor of the tropics.

The kingdom of Israel contained 9.400 square miles. more fertile country than Judah. Its territory lay hetween Judah and Syria, so that it was in close contact on three sides with heathen nations, who had the activity and physical qualities of tribes which loved excursions into other countries for booty. Of the nine kings parailel with the four kings of Judah, it is worth while to remember Jerohoam, 22 years; Omri, 12; Ahsb. 22. Jezebei, Ahab's heathen queen, was the most influential factor in the religious decline. The kingdom was subject to revolutions, and the nine kings of this period belong to five dynastles.

The stories of these bero-prophets should become familiar in their main incidents to all the children, who can see what brave, heroic men can do when they are in earnest for the right. Eiljait preached God Aimighty, his truth, his laws, his power to heip, and the absolute necessity of being joyal to him, if the individual or the nation would prosper by a life worth the liv-

For all the children the teacher can make a most profitable review by a plan used by a successful friend. He took a large sheat of heavy paper, say 12 by 15 inches, and drawing a line down the center, on the left hand side wrote a series of questions in letters so large as to be easily seeu by all the class. On the right side of the fine he wrote the answers. These questions were given to the class, and they read the answers two or three times. Then the paper was folded in the middle, so tha the answers were out of sight, while the questions were still before the class, and they were to show how weil they had learned the lesson. Such a review can he made very effective.

From the first there was religious deterioration, from the worship of Jehovah by goiden caives to the worship of thal with all its licentious rites. So that true religion was almost obiiterated. The Moahita Stone with its records of this time is atili preserved Giasgow.-V. fl. filldreth, a wealthy in the Louvre, Paris. Here the true farmer who lives three miles from religion in its conflict with heatheniam suffered an almost entire and desperate defeat for a time. But there was a raily and raformation under Eiltions trains will be running over the top of the door and the wagon seat and jah and Elisha; which was continued Kentucky Highlands branch of the i. crushed. He was carried home on a and advanced by Jehu, through his an-

INDUSTRY IN TRADE

Moderate Improvement Shown and Small Buying, Especially in Dry Goods, Vary Noticeshie.

New York.-II. G. Dun & Co.'a Weeky Iteview of Trade said:

The moderate improvement in industrial and trade conditions since the beginning of the year continues. Two important elements of strength in the situation are the existing low stocks of merchandise and the existing large stock of money. Certain developments not directly associated with the trade itself have caused a more conservative feeling in iron and steel, although evidences of improvement continue to multiply. These signs of progress inciude a further substantiai increase in unfilled orders on hand by the leading producer and an expansion of 35,000 tons in the output of pig fron during February, the first gain reported in nearly a year.

Dry Goods Moving.

Business in the primary dry goods market continues generally in restricted volume and curtailment of operations in mill centers is still large. In spots trade is good and distributors are able to move merchandise in small iote, aithough price concessions are common in cotton goods. Some comment was caused by a revision of price in one line of staple prints, but other prints did not follow and the printed goods division of the industry is relatively better than trade with bleachers, dyers or finishers. Export trade is fair. The leading producer of men's wear has secured a liberal volume of future business at very close prices and there is a marked tendency among users of dress materials to purchase the better qualities.

In Footwear.

Boot and shoe conditions show an improvement. Jobbers are placing larger orders and while the demand is still chiefly for odd styles, specialties and etaple lines are now receiving more attention. Prices rule steady to firm and owing to the scarcity of Russia calf icathers, shoes cut from this material are about to per cent higher than a short while ago.

fildes are in steady demand. All of the upper leather tanners have now returned to the old discounts on the hasis of 5 per cent off 10 days, and shoe manufacturers are endeavoring to accomplish the same in sole leather.

Farm Work Progressing.

Bradstreet's weekly letter said: The presence of numerous buyers in the principal markets has tended to produce a moderate degree of improvement in house trades and early farm work is progressing under favorable conditions, while fail-sown grain appears to be in good shape. incidentally the progress of the season has im-

parted a little more zest to retali trade. Business Failures.

Business failures in the United States for the week ending March 9 wero 230, against 256 fast week, 250 in the like week of 1910, 254 in 1909, 278 in 1908 and 186 in 1907. Business failures in Canada for the week numiver 34, no against 33 last week and 36 same week of 1910.

The Export Trade. Wheat, including flour, exports from the United States and Canada for the 873 bush, against 2,980,200 last week

and 1,679,453 this week last year. For the 36 weeks ending March 9, exports are 84,759,830 bush, against 110,605,716 in the corresponding period last year. Corn exports for the week are 2,354,605 lmsh, against 2,861,527 jast week and 1,022,896 In 1910. For the 36 weeks ending March 9, corn exports are 34, 228,336 bush, against 19,664,533 last year.

The Real Value of a Garment

YOU may not thoroughly realize it, but it is a fact that the true value of a garment depends on the manner in which it is made and trimmed. Good cloth with poor tailoring and poor fitting qualities makes a most unsatisfactory garment, no matter what you pay for it. The real worth of a suit or an overcoat depends, to a remarkable extent, on the class of trimmings used, the class of tailoring employed, and upon the fit.

We want you to see our \$15, \$18 and \$20 Suits

which we specialize. If we were not thoroughly convinced that this country produces no better clothes at the price, you must realize that we would not constantly recommend them to our customers. Come in and see for yourself.

History of the English Bible

Ninth Article-The King James or "Authorized" Version-This the Tercentenary of its Publication-1611-1911-The Most Famous of all the Translations-Its Popularity-The Greatest Literary Merit but Revision of 1881 More Accurate.

By PROF. J. R. ROBERTSON

The Tercentennial dredth anniversary of the publication Council and ratified by the King of the most famous of the English Bibles, the version of King Janiea. The celebration of this event will arouse interest not only in the origin and history of this well known lible but also in all of the English itibles and under fitting leaders. The list which preceded it.

Puritan's Suggestion

The suggestion which led to the were forty-seven in nil and they version of King James first came from the liampton conference which ling but for tolerance and literary apthe King called upon his accession to preciation. A series of rules was drawn settie the religious question. A Puri- up for their guidance which seem to tian divine by the name of iteynoids have been kept in part but neglect-'moved His majeatle that there might ed whenever they wished to do so. be a new translation of the Bible" The plan of translation was adopted because those already in existence in 1604, the work began in 1607 and were corrupt and not answerable to the Bible was published in 16t1. The the truth of the original." The sug-title of this new version was: "The ous, both offensive and defensive" gestion seems to have been especial- libly Bible contoyning the Old Testaand the Bishop of London at once out of the original Tongues; and with any of wholesome food against fenreplied: "If every man's humour the former translations diligently owed traditions"—"a physician's shop should be followed, there would be compared and revised by his majes- of preservatives against poisoned here no end of translations."

Pleasing to King

The Idea, however, though proposed by a Puritan pleased the Klug who with a page 161/2 by 101/2 inches. The was a queer combination of vanity paper was heavy, the book had 1,500 and joarning. It was a good time for pages and was about 3 inches thick. such a work to be undertaken when There were no illustrations but many England was "a uest of singing fine initial jetters were included. The birds," whon there were not only eru- text was arranged in two columns dite scholars in the land hut also and the type was the old black writers of beautiful and picturesque faced English. The division into English. The King's voice favored chapters and verses was continued as "one uniform translation," to be done in the Geneva Bible, Beside the text the Bishops Bible, Tyndale's, Coverby the "best learned in both univer- there were many pages of supple-

mentary matter. A dedication to the king, nn address of the translators tion was finished. to the reader, a kalendar, and an alamanae. A special monopoly was granted to one James Speed to place in each copy a genealogical table of several pages.

Few Notes

There were no marginal notes in sities" reviewed by the "learned of the King James libble except such as The present year is the three hun- the church," passed on by the Privy would explain more fully a Hebrew or a Greek word. When words had 'divers significations" the rules instructed the translators to keep that which hath been most commonly used by the most eminent fathers, being agreeable to the propriety of scholars, meeting in different places the place and the anniogle of faith." meluded Purltan scholars as well as The allegiance to this practice helpthose of the established church. There ed much in producing that unity which was so much desired and the jack of which had weakened Protestant England, encouraging the Catholies in their hope to reclaim it.

Translators' Address This Bible went out among the people with everything in its favor. The translators in their address to the readers called it not only "an armour but niso a whole armoury of weap--"not an herb but a tree or rather d against the "Bishops Bible" ment and the New, newly transinted a paradise of trees of life"-"a pansies"-"a pandect of profitable laws against rebelllous spirits'-"a treasury of most costly jewels against beg-The first edition was a large folio garly rudiments"-"a fountain of most pure water springing up into

> everinsting life." Revision of Other Bibles

Though the title page speaks of the King James Biblo as "uewly transiated" it was in fact only a revision. The translations were to be used "when they agree better with the text than dale's, Matthew's, White Church's and the Geneva," The purpose is again expressed in the hope that out of "many good ones" they might make "a principal good one" and the same purpose is seen in the phraso applied to the new libie, "whatever is sound already, the same will shine ns gold more brightly being rubbed and polished." Certain it is that verses and whole chapters may be found like those in the libies above referred to and oven the Catholic Bible of Douay. The translators worked over nii the materiais at hand, compared and recompared again and again bringing "hack to the anvii that which we had hammered."

A curious puzzie is suggested in the edition of 1611 from the fact that into the city" and another reads, "She went into the city." These first editions are therefore sometimes cailed the lie and the She Bibles. The puzzlo may be explained by as-

suming that part of the printing was be confessed they are in better redone by another than the printer of puto in our minist than they should the King because of the haste to be. It would not be a bad idea to get the Bible to the people or for debar them from the Chapel altosome similar reason. A difference in gether.

The band is in great favor in Bethe title page is also noted for some ren and it is the favor of merit. Mr. had a fine engraving and others a wood eut of different design. The Canfield deserves grent credit for wood cut was probably used because his efficient leadership and the exthe plate for the engraving was not ceilent training given.

PACKARD ENTERTAINMENT

Although Berea has been almost surfelted with good things for the The King James Itible has circulatpast week, a large audience was preed from 1611 until the present time sent, fuesday night, to see and hear superseding all other versions, in lit-Packard, called, by Captain Hohson, erary merit it has never been sur-'America's greatest cartoonist and passed hut the revision of 1881 and caricaturist." This was the last numinter excel it in accuracy of transla- ber on the Lyceum Course for 1910 straight line in rear parallel to front tion, It is always spoken of as the and 1911, and was fully up to the 'authorized version" but there is standard of good things that the comno evidence that it ever received any mittee has offered the public this formal authorization beyond the ready

for criticism with confidence if you have made it of Cream of Wheat flour. For there will be no fault to be found with it from crust to center.

Include a sack of Cream of Wheat flour in your next grocery order. Don't take any other kind. There is only one best flour as you'll acknowledge when you come to use the Cream of Wheat brand.

ROLLER MILLS

ANDREW ISAACS, Prop.

SYNOPSIS

Capt. Nathaniet Pium, of the sloop Typhoon, lands secretty on lieuwer Island, stronghold of the Mormons. He is suddenly confronted by Obadish Price, an secentric old man and a memter of the Mormon education of the Mormon education and a memter of the Mormon education and a memter of the Mormon education that ite has got the wrong man, and bargatins for the ammunition abourd the sloop. He binds Nat by a selemn eath to deliver a package to Franklin Pierce, president of the United States. Near Price'a cabin Nat sees the frightened face of a young woman who disappears in the darkness, leaving an odor of tilaca. It develops that Pium's visit to the Island is to demand settlement from the king. Strang, for the looting of his ship some time previously, supposedly by Mormoos. Canay, the mnie, has been left in charge of the sloop with orders to bombard St. James if Nat does not return within a certain time. Price takes Nat to the darkness, to the king's home, and through a window he seas the king and his wives, among whom is the lady of the liliacs, whom Price says is the seventh wife. Tium calls at the king's office, where he is warned by a young woman that his litts is in danger. Strang receives Plum cordially, professes indignation when he hears the captain's griev-ance, and promises to pinnish the guilty. Plum again receives werning of his daver. He rescues Nell, who is being publicly whipped. The king orders Arbor Crocken, the sheriff and father of Winnsome, the girl whom warned Nai, to pursue and kill the two men, thim and Nell plan to escape on the Typhoon. Plum learns that Marion, the girl of the lillace, is Nelt's sister. She is not yet married to Strang. Plum suggests carrying her off on the ship. Nell approves. They signed to include Winnsome, with whom Price is in love, in the enterprise. Nat

CHAPTER VI-Continued.

tle would go to the councilor's. Having once decided, Nathaniel turned in the direction of the town, avoiding the use of the path which he and Ohadiah had taken, but following in the forest near enough to use it as a gulde. ' He was confident that Arbor Croche and bis aheriffs were confining their man hunt to the swamp, but in spite of this belief he exercised extreme caution, stopping to listen now and then, with one hand niwnya near his pistol. A quiot gloom filled the forest and by the tree tops he marked the going down of the sun. Nathantel's ears ached with their strain of listening for the rumhling roar that would tell of Caacy'a attack on St. James.

underbrush ahead of him, a sound that came not from the strain of listening for the rumbling roar and in a moof the hugo roots of an overturned tree, drawn pistoi la hand. Whatever object was approaching came alowly. as if hesitating at each step-a cauilous, atealthy advance, it struck Nnthnniel, as be cocked his weapon. Directly in front of him, half a stone's throw away, was a dense growth of hazel and he could see the tops of the siender hushes swaying. Twice this movement ceased and the second time there came a crashing of brush and a faint cry. For many minutes after that there was absolute silence. Was it the cry of an animal that he had heard-or of a man? In either case the creature who made it had tallen in the thicket and was lying there as still as if dead. For a quarter of an hour Nathaniel waited and listened. He could no longer have seen the movement of bushea in the gathering night gloom of the forest but his ears were atrained to catch the slightest sound from the direction of the myaterious thing that lay within less than a dozen rods of bim Slowly he draw himself out from the shelter of the roots and advanced step by step. Half way to the thicket a stick cracked foully under his foot and as the sound startled the dead arena at the whipping-post. quiet of the forest with pistol-shot clearness there came another cry from the deuse hazel, h ery which was neither that of man nor animal but of sbout Nathaulel aprang forward to hut he could hear the tremble of it in the white face and outstretched arms captured by the Mormons and those of Marion. seemed to have fied he forgot avery-thing but the joy of this moment— "And I?" thing but the joy of this momentforgot all in life but this woman against his breast. He klased her soft month and the closed eves until the eyes themselves opened again and gazed at him in a startled, half understanding way, until he drew his head far back with the shnn.e of what he had dared to do flaming in his face.

And as for another moment he held her thus, feeling the quivering life returning in ber, there came to him through that vast forest stillness the distant deep-toned thunder of a great

"That's Casey!" be whispered close down to the girl's face. It's voice was nimost sobbing in its happiness. "That's Casey-firing on St. James!"

CHAPTER VII.

The Hour of Vengeance. For perhaps 20 seconds after the inst echoos of the gun had rolled through the forest the girl lay passive in Nathaniel's arms, so close that he could feel her heart beating against his own and her hreath sweeping his face. Then there came a pressure agninst his hreast, a gentle resistance of Marion's half conscious form, and when she had awakened from her partial swoon he was holding her in tho crook of his arm. It had all passed quickly, the girl had rested against him only so long as he might have held a dozen breaths and yet there had been all of a lifetime in it for Nathaniel Plum, a cycle of loy that he knew would remain with him forever. But there was aomething bittersweet in the thought that she was consclous of what he had done, something of humilintion as well as gladness, and still not enough of the first to make him regret that he had kissed her, that he had kissed her mouth and her eyes. He loved her, and he was glad that in those passing moments he had betrayed himself. For the first time he noticed that her face was scratched and that the sleeves of her thin wnist were torn to shreds; and

(TO BE CONTINUED.)

Officers Must West Mustache. Some of the cavairy subalterns at Aldershot are smitten in a teuder place by the enforcement of the order that all officers must wear a mustache. The regulation on the subject is explicit and dates from the time of Queen Victoria. It reads as fol-

"The hair of the head will be kept short. The chin and underlip will be shaved, but not the upper lip. Whiskers if worn will he of moderate length."

The fad for shaving the upper lip is a specialty of cavairy subatterns, who wish to distinguish themselves from their comrades of other branches of the service. Field Marshal Lord Grenfell had to issue an order calling attention to the regulation when he was in command in Ireland,

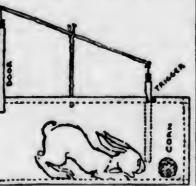

The regulation aims entirely at maintaining a amart sppcarance and dates from shortly after the Crimean war, when Queen Victoria objected to her soldiers wearing beards. in the navy the rule is that an officer must be either clean shaven or wear "a full set."-London Daily Mail.

Why Doctora Bear Charmed Lives. The reason doctors do not eaich disease is because they never think about it. They very seldom take any precautions to secure this amunzing inmunity, beyond, perhaps, a cold sponge bath regularly, smoklug, a pinch of snuff, gargling the throat with some well-known disinfectant, or washing their hands in an anaeptic solution be fore and after attending to a paticat. A doctor may carry disease from one house to another without contracting It himself. An army surgeon had to cope single-handed with a terrible outbreak of cholera. When the rush was over, the medical man, absolutely exhansted sank onto a bed which a short time previously had been occupied by a bail cholera case and slept for 43 hours. Yet he dld not contract the com-The hope that nad risen in his beart pinint, although be had taken no preventive mensures. He simply didn't thick about it. And then is the whole

Many Boys Use Device Shown in Illus tration to Capture the Festive Lit. tle Cottontali.

HOW TO MANUFACTURE PAPER

Some Interacting Facts as to its Origin and Materiats it is Made of-Its Many Uses.

We derive the word paper from the tatin papyrus, the name of an Egyptian plant, from which the ancients made a very desirable material for writing. Aimost every species of tough, tibrous regetable has st one time or another heen employed in the manufacture of paper Even the roots and the bark of trees, stalks of the nettle, the common thistle, the stem of the hollyhock, hay, straw, cabbage stalks, willow, sawdust and wood shavings have all been used.

in the library of the British Museum there is a book, printed in low Dutch, that contains no less than fiftyeight specimens of paper, all made of entirely different materials, the result of one man's experiments as far back

Whatever the material used, the pa per making process is the same: The rags, burk or fibres must first be and I am going to keep them until next | made into a smooth pulp, the pulp is summer and then raise some young just late the paper markine, and in a short time is converted into paper.

The so-called rice paper of the t'hione. I can niways tell when there is nese is not made of rice. The name a prisoner in the trap without look- is a misnomer that originated in a ing inside. The largest In the country near Springfield, Ill., I sheets that can be obtained in this way are about fifteen inches in length and about ten inches in widtle. These sheets of pith have a commercial value in thina, for there they are used in the manufacture of many aseful and ornamental articles.

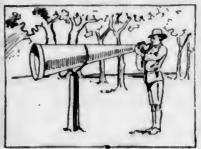

As soon as the sheets are cut they are spread out, all little holes in them are carefuly mended with bits of mica, and they are then made fist by pressure. The smull, inferior sheets are brilliantly dyed, and then sold to tlower manufacturers. On the large sheets native srtists paint quaint, bright-hued pictures of insects, hirds and flowers, and find a ready market for them, both at home and abroad

tell of all the ways in which it is possible to use paper. We are told that it takes but twenty-nine hours to convert linen fibre into a paper carwheel. The wheel is composed entirely of paper rings, which, when piled toosely, stack as high as the shoulders of a man of average height. These rings, under treatment, sink to the thickness desired, and are then securely fastened by means of bolts, and a steel tire is put on them. In Russia and Germany paper car-raits have already heen used; to some extent, and have given satisfaction. Enthusiastic paper manufacturers tell us that paper houses, paper inrniture of every description and paper clothing of every kind will be in use in the near future.

BUGLE CALLS IN MEGAPHONE Sound Carries Two or Three Times as Far as in Ordinary Way-Passed

From Point to Point.

The megaphone as an adjunct to the bugia, is becoming increasingly important in army life. Itugle-calls blown

How God Answers Prayer

By REV. H. PAGE DYER eter of Episcopal Church of Accession, Philadelphia

Why should we pray? Many iniciligent people say we should not pray and they give reasons for so believing, itut even ao, when there comes Into their life some scrious lilness, or some approaching disaster, or the facing of denth, almost all of them fall to prayer.

Even infidels and agnostics and atheista have been known to turn to tlod at such a time; they have censed to rely upon their ntheism or agnosticism and have felt the fled they had denied to he their only help in their time of need. One such in his extremity, who was not willing to break wholly with his denial of tlod, cried ont as he was lying, "O God, if there be a God, save my soul, if I have a

sout." If onn were to ask us why we should pray we could give many answers. If we hellove in a tiod at all tand almost everybody does), we realize his power and our dependence, and, therefore, the need of prayer. If he esn help us (omnipotent) and knows how to help us iomniscientl and wants to belp us tail-loving), then there is only left

the need of our request or prayer. Every religion of every kimit, heathen, pagen, superstitions, Jewish, Christian, does pray. If, therefore, we fail to pray we are putting our judgment against every religion past and present known to man, and also against the instinct of every race. hlack, white, yellow, savsge, wild or

civilized. This seems to be a rash position to take and we would not think of taking such a sland in sny matter other than our relationship to tiod. And if there be an intelligent and loving delay, it is not very polite or courteous not to speak to him at times. This speaking to him should include adoration and thanks, as well as begging. We would not so neglect a merely human friend

But if we do pray, how does the suswer us? We find men hold two diverse theories as to this. One is That tlod sends his answer directly from heaven and not through an agent. But this is surely contrary to our universal experience, in our secuisr life every good and perfect gift comes from God sione, but always

through some one else Har money comes from Bod, but through dealings with men; our clothing comes from God, but through dealings with an importer, merchant or tailor. In our physical life our birth, development, cure and nourishment all come from God, but through our mother, exercise, doctor and food 1 said this at a mission and challenged any one to find an exception. The only thing they could suggest was a farmer's prayer for rain, which came. But this involved clouds and barometric pressure and oceans and for-

ests and may meteorolgical agents. The second and true cheory is that God answers our prayers the alone can, but always through some agency As this is true in our secular and physical life, so it is true in our spiritual life. As we got our physical life from it would be next to impossible to God through our mother, so we get our thristian life from God through

> bantism. As we got our physical strength from God through exercise, so we get our spiritual strength from tiod through confirmation. As we get our spiritual nourishment from God through bread, meat, etc., so we get our sidritual nourishment from God through holy communion. As we get our phyhical cure from tion through the doctor and medicine, so we get our spiritual cure from God through

> This law is so universal and so simple that we would never think of doubting it if it were not for our re-

> ligious prejudices. What are some of these agencies which God uses? The four fundamental needs of birth, strength, food. cure are supplied as above. There are many incidental and subsidiary needs all supplied by God but through

> > Restored in Christ.

agencies.

Our Lord once encountered a man who had n withered hand. In spitn of the captions questioning of the Jews, perhapa in order to allence it. t'hrist, at the dictate of his own merciful heart, said to the afflicted man, stretch forth thine hand! And when he stretched it forth it was restored whole. The moral is evident-in human acciety there are/many paisted handa-atrophied powers or unused facultles-needing to he restored to full duty as social ministrants. There is only one way to accomplish this result—use what little power is left in stretching forth the imperfect faculty in the direction of Jesus Christ, who can endue it with fuller life and potency. If in your life there is any loss of efficiency, any withered band, put it at once into working condition. through thrist's grace, in the line of duty.

Power of Faith.

No matter what your temperament may be, you can develop your power of faith .-- Rev. S P. Cadman, Congregationalist, Itrouklyn, New York.

Doic't overlook the fact that more than ability is required to create wealth, to quality you to dispense it,

PROTECT THE YOUNG CHICKS

Loss Through Depredations by Crows, Hawks, Cats and Other Enemies May Bs Avoided.

A covered coop or yard is advisable on most farms for raising young chicks. The loss through depredationn by crows, hawks, cats and other encuien is very large, and must of this can be avoided by raising the chicks in well protected coops or yards, says Farm and itome.

A yard that will give sufficient protection should be inclosed on sides and top. The first three feet of netting should be of one-inch mesh, the balance of two-inch. Either this netting or a hoard should be furled several inches in the ground, so that skunks cannot dig under, in a yard 20x40 200 chicks may be raised until large enough to take care of them-

Where prooders and individual houses are used a small covered yard should be attached to each house and

individual Coop and Covered Yard.

the same device should be adopted for individual coops. Make the framework of furring strips 1x2 inches and 6 to 8 feet long.

Cover the sides with inch mesh netting 18 inches high. Put a ridge pole in the center, so that you can set board shutters against them. These may be made of half-inch boards and will give needed nhade, sa well ss protection from storms.

This yard should be permanently attached to the coops. After the ehicks are old enough to care for themselves, let them out during the day by raising up oue end, and after they go in at night they are easily shut up. it is only ten seconds' work to move the coop daily two feet onto fresh grass.

POLLUTION CAUSE OF DISEASE

Too Many Fowls Kept on One Enclosure for Year Without Changs of Ground-Should Bs Divided

Nearly every poultry raiser keeps too many fowls in a limited area of ground. It is a common circumstance to hear of some person having good success with poultry for a few years, when all nt once things begin to go wrong and the person loses faith in the industry. Chickens die hy the dozens, and those that remain alive place high enough so that the fowls fall to yield a profit. The cause of cannot roost on it, yet so that they all the trouble seems to be hidden, yet | can feed from it readily. Use hangers it is not far to find, right in the ground of the poultry yard.

Fifty or a hundred or more chicks or any other domestic animals, kept in one enclosure for a year without change, wi'l pollute their surround ings. This is true even with healthy fowls, and where disease breaks out it is much more true. The pollution extends, an a rele, not enly to the grounds, but to the poultry house as well. It is often impossible or difficult to purify the house. The result is that poison or disease become deep seated in the surroundings and stringent methods must be resorted to th order to erndicate them.

it is easy, or at least possible, to clean and purify almost any poultry house and make it fit for continued habitation of fowls without having to change them to other quarters. It is not so easy with yards and grounds. The notion is so deeply absorbed by them that it requires months to remove it.

The immediate grounds around a ponitry house receive the most poliution. The grounds further away receive less. For this reason, the grounds immediately adjacent to the poultry house should be divided by fence into at least two parts and each part cultivated in some crop every alternato year, with all poultry kept from it during the season of cultivation. This will nilow much of disease and other posts to die out for went of anything to feed on, and much of pollution and polson will be consunted through physical and chemical action in the soil. if the ground is plowed deeply some of them will be buried so decoly that they will never come to light. Cultivation, aeration and the growth of plants in the soil all bave a general teadency to soil puritication from the point of view of

animmi sanitation. Poultry grounds on the average farm where there is an abundance of free range can be kept comparatively fresh by always feeding the fowls away from the poultry house. They will feed and range in other places if no inducements are placed at or near the house. Then they will use the house only for roosting and laying purposes and the natural daily poliution will be carried far away.

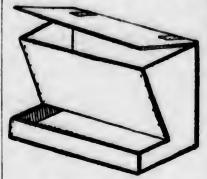

Exercise for Fowis.

Rather than pamper your fowis with too much rich food, see that they get plenty of exercise in procuring what they do eat.

Device Shown in Illustration Will Hold Sevaral Days' Supply-Will Bs Found Handy.

Where it is desired to keep the feed before the poultry, or any grits or shell, the hopper shown in illustration will be of vaine, as this may he huilt to hold several days' supply, nays Homentead, ity constructing partitions inside same, several kinds of feed may be fed from the name hopper.

The sides are constructed in the manner shown; cutting same from a board, that is the same width as the

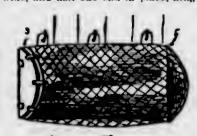

Feed Hopper for Poultry.

width denired for the hopper, to these are natied boards to make nn open tray at the bottom, with the bulance of hopper inclosed. The feed placed in the top will automatically replace that in the tray, as fast as the tray is emptied. The tray should not be too wide, about a two and onehaif inch space is ample; then the hens cannot spoil the grain by stand-

GREEN FOODS FOR CHICKENS

When Scarce or Difficult to Ohtsin It Is Wiss to Altow None of Feed to Go to Waste.

When green food is scarce or difficult to obtain it pays to plan some way to prevent its being wasted. Cut two pieces for the ends of a box, each twenty-four inches long, getting proper curve by using a compass. Make the back of the holder of thin boards four feet long and twenty-four inches wide, and nail one end in place, hing-

Saves Gresn Feed.

ing the other end and using small straps of leather to hold it shut. Cover the holder with coarse mesh wire netting and hang it in a convenient of wood, tin or lenther,

This box will enable the fowls to pick at the green stuff, whether it is porary or so-cniled "wet weather" clover, grass or chopped cabbage, without danger of the mass becoming soiled or destroyed by the chickens scratching in it.

Geese More Profitable.

Geese will undoubtedly prove more profitable than chickens or turkeys, considering the amount of the coat of feed and labor, for they do not require neur so much care and attention as fowis and the feed is a small considgration, for their principal food is grass, weeds, clover, aifaifa and such.

tion and health.

A ration rich in earbon will produce too much fat.

it is not necessary to build elaborate poultry houses.

Too highly stimulating food is apt to cause liver troubles.

ited heets, either cooked or raw, are excellent for fowls.

The best preventives for mites are cleanliness and nunlight. tieese nhould have access to green

forage no early as possible. Having chosen your incubator, study the book of directions and fol-

low it carefully. Food rich in earhohydrates tends to

the production of fat, and fat hens are not the hest of invera. it is very bad policy to feed the

hem nothing hut corn; but it is being done by many. Feed a variety. The trap nest is the only device that will pick the laying from the non-

laying hens with absolute certainty. The waste from the barn floor, corn sheller, hny yards, etc., make excelient scratching material for poultry. For all, the production of eggs is an

important object in poultry-keeping; the main object. For the chickens alone you will find a feed tuiti pay, but it is a wiser plan

to buy one large enough to handle feed for all stock. To produce fertile, hatchable eggs chicks we must have healthy, vigor

ons, breeding stock.

FEED HOPPER FOR POULTRY EXCELLENT MATERIALS FOR

Prove Incentive for a More General and Careful Study of Subject.

(By W. L. BPOON.)

The mixing of asnd and clay as a form of road construction has received careful study and in of great importance, especially to the Atlantic and Guif states, where throughout large arean nand and clay are practically the only materials available for road building.

It may safely be said that the construction of sand-clay roads had pasned the experimental stage. It ban been proved that they are well adapted for light traffic, and are less noisy, less dusty, and more resilient than the average macadam road. Even under heavy trains they have proved to n great extent satisfactory. There are nand-clay roads in the South Atlantic and Guif states over which heavy londs of cotton and other form products are hauled throughout the year with but little resulting damage. When the cheapnenn of this kind each succeeding load thus being haulof construction is considered, it will be neen that for certain localities at be taken to spread each neparately least it in preferable to macadam.

In all forms of road construction the most important consideration is that of drainage. If natural drainage does

sandy soils as in clay soils, and therefore need not be so carefully guarded against. Nevertheless, if any indications of these springs are found, precautions should be taken to conduct the water to the side ditches by some form of underdraininge,

When the drainage has been properly provided, the roadbed should be brought to a crown. It has been found more economical to crown first a section of the road nearest the

thoroughly before hauting any clay

Subjected to Travel.

pointn wenk pinces are sure to be developed in the course of time. Aithough natural drainage is much better on sandy subsoils than on clay, in ciny districts the conformation of the country is more likely to be of an undulating or rolling character, thus

Cost of Raising Stock.

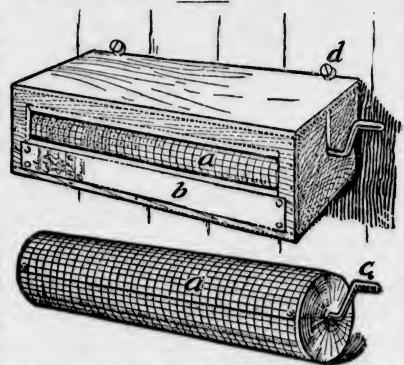

The cost of raising caives and pign from birth to maturity is discussed briefly by the office of experiment station, in Farmers' Bulletin No. 202. siong with a number of other short "government farm experiments," Some dozen instances are recorded of raising snimals along the varied lines advocated by different growers, of which accurate account has been kept. At the Storrs (Connecticut station) eight caives gained on an average of 1.31 poundn per dsy. On the hasin of the recorded data of various tents the estimated cost of raising a calf until two years old is \$33.20, with the prevniling prices of feeding stuff in Connecticut.

In some extensive experiments with pig feeding it was calculated that on an average it took 2.77 pounds of digeatible nutrient at a cost of 3.12 cents to produce a pound of gain with julgs from hirth to maturity.

Cultivate Poultry Runs.

Fresh turned earth has great powers of abnoration of fith and the cui tivating of the poultry runs is advisunio furnishing a natural watersbed. Tem- rons, by frequent turning of the soil you are assured of sanitary conditions springs are not so likely to occur in if you do it.

DEVICE FOR KEEPING RECORD

renents the method of J. 11. Rines, ien per commining the name above the cyl of the dairy herd, says the Oronge It will be easier thus to keep the rec-Juid Farmer. it is a very simple upparatus. The roller is a round cylin- the strip of paper. This device can ier of wood, into which is inserted an be made at home and at a very low iron handle. IJpon the cylinder is cost. wrapped the sheet of paper upon which the records of the cows are kept. This may be a plain sheet of paper, when the account of the searcity of oak, put on the cylinder. After placing the chestnut and other and wood timber cylinder in the hox, by revolving the cytinder and holding a pencil against the paper, it will make a straight line the nofter woods, which have been around the cylinder. The horizontal for the great number of people it is lines can be made with a pencil by us. sote, zine, chieride, etc. Preservative ing the edge of the opening in the box treatment can make a heech, red oak as a straight edge. In the flustra or pine tie outlast n white oak tie. tion the strip of paper which is placed on the box just below the opening through which the cylinder appears contains the names of the cows. These that will bring forth vigorous, livable names are opposite the columns on the to improve the market for those

Soft Wood for Ties. commonly used for ratiroad ties, rallroads have been successfully using treated with chemicals such as creo The use of scrow spikes instead of nnii spikes enables the noft wood to resist the strain and hold the rails la pince. The use of soft wood is likely roll where their record is kept. A grades of timber suitable for the purslight improvement might he made to pose.

GOOD ROAD CONSTRUCTION 1855 Berea College 1910

Benefits Derived From Clay-Sand Highways Should FOR THE ASPIRING YOUNG PEOPLE OF THE MOUNTAINS.

Places the BEST EDUCATION in reach of all

Over 64 instructors, 1365 students from 27 states. Largest college library in Kentucky. NO SALOONS.

A special teacher for each grade and for each main subject. So many classes that each student can be placed with others like himself, where he can make most rapid progress.

Which Department Will You Enter?

THE MODEL SCHOOLS for those least advanced. Same lectured library and general advantages as for more advanced students. Arithmetic and the common branches taught in the right way. Drawing, Singing, Bible, Handwork, Lessons in Farm and Household Management, etc. Free text

TRADE COURSES for any who have finished fifth grade (fractions and compound numbers), Brickwork, Farm Management, Printing, Woodwork, Nursing, Dressmaking, Household Management. "Learn and Earn."

ACADEMY, REGULAR COURSE, 2 years, for those who have largely finished common hranches. The most practical and interesting studies to fit a young person for an honorable and useful life.

CHOICE OF STUDIES is offered in this course so that a young mar may secure a diploma in Agriculture and a young lady in Home Science. ACADEMY, COMMERCIAL, 1 year or 2 years to fit for business. Even

a part of this course, as fall and winter terms, is very profitable. Small-ACADEMY, PREPARATORY, 2, 3 and 4 year courses, with Latin, Ger

man, Algebra, History, Science, etc., fitting for college. COLLEGIATE, 4 yearn, Literary, Scientific and Classical courses, with use of laboratories, scientific apparatus, and all modern methods. The highest educational standards.

NORMAL, 3 and 4-year courses fit for the profession of teaching. First year, parallel to 8th grade Model Schools, enables one to get a first-class certificate. Following years (winter and spring terms) give the information, culture and training necessary for a true teacher, and cover branches neces sary for State certificate.

MUSIC, Singing (free) Reed Organ, Voice Culture, Plano, Theory, Band, mny be taken as an extra in connection with any course. Small extra

Expenses, Regulations, Opening Days.

Berea College is not a money-making institution. All the money received from students is paid out for their benefit, and the School expends on an average upon each student about fifty dollars a year more than he pays in. This great deficit is made up by the gifts of Christian and patriotic people who are supporting Berea in order that it may train young men and women

OUR SCHOOL IS LIKE A FAMILY, with careful regulations to protect the character and reputation of the young people. Our atudents come from the best families and are earnest to do well and improve. For any who may be sick the College provides doctor and nurse without extra charge.

All except those with parents in Berea live in College buildings, and assist in work of boarding hall, farm and shops, receiving valuable training, and getting pay according to the value of their labor. Except in winter it is expected that all will have a chance to earn a part of their enpenses. Write to the Secretary before coming to secure employment.

PERSONAL EXPENSES for elothing, laundry, poetage, books, etc., vary with different people. Berea favors plain clothing. Our climate is the best, but as studentn must attend classes regardless of the weather, warm wrape and underclothing, umhrellas and overshoes, are necessary. The Co-operative Store furnishes books, toilet articles, work uniforms, umbrellas and other necessary articles at cost.

LIVING EXPENSES are really below cost. The College asks no rent for the fine hulldings in which students live, charging only enough room rent to pay for cleaning, repairs, fuel, lights, and washing of bedding and towels. For table board, without coffee or extras, \$1.35 a week lethe fall, and \$1.50 in winter. For room, furnished, fuel, lights, washing of bedding, 40 cents a week in fall and spring, 50 cents in winter.

SCHOOL FEES are two. First a "Dollar Deposit," as guarantee for return of room, key, library hooks, etc. This is puid but once, and is returned when the student departs.

Second an "incidental Fee" to help on expenses for care of school buildings, hospital library, etc. (Students pay nothing for tuition or services of tenchers-all our instruction is a free gift). The incidental Fee for most students is \$5.00 a term, \$6 in Academy and Normal, and \$7.00 in Collo-

CAPT. HOBSON IN BEREA

of states and nations. And the forces by which all this is to be done are those that touch the individual organism, the individual simself, not in reforming the old but in teaching the young-the schools and the churches are the forces.

The College is quick to take advantage of the presence of any great personage to give inspiration to the student body and teachers as well, and often drafts into service fecturers and others who are here for a single purpose for other programs, Such was the treatment given Captain Hobson on Tuesday morning, and an audience quito as large aa the one that listened to his lecture, Monday night, greeted him at united Chapel.

His address was more than an hour long and was tremendously interest ing from first to iast, He had been requested by President Frost to speak of agriculture in the South and began his address by teiling how he carried agricultural experts through his district in Alabama, and how the South in general is taking to scientific farming.

From industrisiism he drifted ensiiy into the causes of war, mentioning four, the control of vital territory, competition in trade and commerce, race antagenism and the loss of locai seif-government in our western states. He showed that these four conditions now exist and that unless they are relieved, war with the nutions of Western Asia is very probnhie within a few years.

Captain fiobson is not a proping of war but an advocate of peace, but he shows that peace can only be mainained at present by preparation for war, and it is hard to see, when listening to frim, anything but humiliation awaiting our nation in the event of war in our present unprepared state, He showed how we have been and are unable to maintain the open door in thina and the far East and how difficult it will be for us to maintain the Monroe Doctrine in the Western Hemisphere.

At the request of President Frost, delicately, and only to point a inson, the speaker took up the story fature. The "Denir Bill" was to give of the sinking of the Merrimsc and the capture of himself and his companions in Santiago Harbor. The description of his appearance, soaked in oll and coal soot and diked out in Spanish garb, when called upon by roarious laughter, ile pald a glowing tribute to the Admirni and his road session, Thursday, by granting sailors as well, and showed that the American victory was won before battle-ships, thus allowing them to take fire on the explosion of the first shell.

The coming of Captain Hobson was the greatest treat Beren has hid in covery of a revolver, a jury in Squire years, and the inspiration given the Morton's court found in favor of Feit- student body, young men and young ner and awarded him a verdict of women as well, will undoubtedly tell throughout their fives.

One of the stirring scenes was the rising of the entire body of atudents, citizens and teachers expressing their determination to fight the figuor traf-

The Citizen hopes to jublish the address of Captain Hohson in full as soon as space will permit,

BULLETIN ON ARBORICULTURE

The Citizen is in receipt of liuiletin No. 192, issued by the Department of Agriculture, Washington. This limitetin is of juterest for its subject matter but it is of special interest to ail Bereans because Its author is Prof. S. C. Mason who was for a number of years connected with Berea, and who has a seonre piace in the memory and estecur of all who knew him. The subject of the iluifetin is, "Drought Resistance of the Olive in the South-western

Prof. Mason is Arisoriculturist in Crop Physiology in the Department of Agriculture and his investigations tend to show that the olive is a true desert plant for it survives and grows fsiriy weil where other plants die for the want of moisture.
